

Some full-size trees may have 50- to 60-inch-long boughs. Slim profile trees have much shorter boughs that form a compact tree with a total span of 24 inches or less

Create a dizzying display of toy trains in motion by running a complete train on the wider-radius loop and a motorized unit in the opposite direction on the smaller loop

Two pairs of manual turnouts are readily accessible at the front of the layout. For hands-free operation, substitute two pairs of Lionel FasTrack command-control wireless turnouts. (The November 2011 CTT has more information on these and other high-tech track switches)
