1997 Index

This index was compiled to assist the reader in finding information in the 1997 issues of Garden Railways Magazine. It covers six issues, from February 1997 through December 1997. There are hundreds of entries, cross-referenced by article title, author’s name, and subject.

Using the Index

All categories are delineated as follows:

The AUTHOR’S LAST NAME is in capital letters. Below the author’s name is a listing of his/her article(s).

The Article titles are all in boldface type and are listed both under the author’s name and alphabetically within the index.

The Subject listings are all entered in plain type and may include subcategories.

At the end of each listing you will find numbers, such as 14/3 24. The first number is the volume, the number after the slash is the issue number, and the last number is the page on which the article begins. The above example would translate as volume 14 (1997), number 3 (June), page 24.

The Product Review Index

Also included is a supplemental index of all products reviewed in GR during 1997. It is cross-referenced by the type of product and the manufacturer. The manufacturer’s name is in boldface type, and the products are listed in plain type. Volume and issue numbers follow each entry.
