

Table 6: Signal LED output program snippet

```
void outShift() {                                     //shift out data to signals
    digitalWrite(latchPin, LOW);
    shiftOut(dataPin, clockPin, MSBFIRST, ledSignals2);
    shiftOut(dataPin, clockPin, LSBFIRST, ledSignals1);
    digitalWrite(latchPin, HIGH);
}
```
